Bedbug Dogs

There are tremendous benefits to employing bed bug sniffing dogs. The dogs are able to pinpoint locations where bed bugs and their eggs may be hiding. Their ability to find these pests in minutes eliminates the need for invasive inspections and saves time and money. In addition we are able to zero in on areas where treatment will deliver the best results. What sets our dogs apart from other bed bug dogs is that they are all accredited by the National Entomology Scent Detection Canine Association. NESDCA is an independent organization that was created by pest control professionals to ensure the highest standards of scent detection canines available. NESDECA training facilities are required to have ten plus years of training, handling and evaluating experience.

- All of our dogs are rescue dogs.
- NESDCA trained dogs are up to 98 percent accurate in their detection of bed bugs and their eggs.
- Dogs are trained using the same methods used by police organizations to train narcotic and bomb sniffing dogs.

Bedbug Treatments

Go Green Bed Bug Dogs specializes exclusively in the detection and removal of bed bugs. We offer an innovative three step Integrated Management Approach.

NESDCA Trained Dog

The first step is determining if you have bed bugs and where they are located. Our NESDCA (National Entomology Scent Detection Canine Association) trained canine team will aid in the detection of bed bugs. Our canine team has been trained using the highest quality standards in the industry.

Cryonite Freezing Technology

Cryonite freezing is the next step in our IMA approach. Cryonite is a form of liquid nitrogen that kills bed bugs and their eggs on contact. The liquid nitrogen is safe to use on any surface. Electronics and all household items can be safely treated with Cryonite. It has been proven to be safe and effective in eliminating bed bugs and is 100% chemical free.

High Heat Steam Treatment

High heat steam is the final step in the IMA approach. Steam as hot as 420 degrees is used to kill any remaining bed bugs and their eggs.

Go Green Bed Bug Dogs ECO Friendly

Go Green Bed Bug Dogs is a company that specializes exclusively in the detection and removal of bed bugs. We are fully dedicated to taking an environmentally healthy approach to eliminating bed bugs. Our team realizes many of the concerns our clients face when determining what method of bed bug removal to select. Time and time again the harmful effects of chemical pesticides and insecticides in both humans and animals have been proven. Our methods have been proven both safe and effective. Why risk exposing your family and pets to harsh chemicals when it is absolutely unnecessary. Our team is highly efficient and we will guarantee results.
